EXPERIENCE

•SDE-DevOps Intern

Jan 2026 – Present

FinSynth AI

Bengaluru

- Improved **AI service reliability and latency** by building **LLM-driven backend services** in **Python** with multi-model routing and provider fallback mechanisms.
- Designed and deployed **containerized microservices** using **Docker and Kubernetes**, enabling **scalable AI inference workloads**.
- Implemented **GitOps CI/CD pipelines** using **ArgoCD** and **Terraform** for automated infrastructure provisioning and application deployment.
- Optimized **Kubernetes deployments** with autoscaling and **Prometheus/Grafana monitoring** to improve reliability under traffic spikes.

•DevOps Engineer

Sept 2025 – Jan 2026

Veerion

Remote

- Supported **production AWS cloud migration**, improving **system reliability, scalability, and fault tolerance** for live workloads.
- Built and optimized **serverless workflows** using **AWS Lambda, API Gateway, SQS, and DynamoDB** to reduce latency and handle traffic spikes efficiently.
- Automated infrastructure provisioning with **Terraform** and developed **Python/Bash scripts** to streamline deployments and reduce operational overhead.

•SDE Intern

Jan 2025 – Oct 2025

ISRO

Bangalore

- Led development of a **multilingual map translation system (English → Kannada)** for ISRO's **Bhuvan geospatial platform** using **PostGIS and PostgreSQL**.
- Containerized services with **Docker** and built **translation APIs with Redis caching**, improving scalability and response time for geospatial data services.

TECHNICAL SKILLS AND INTERESTS

Cloud & Infrastructure: AWS, GCP, Terraform, Ansible, Nginx, Linux (Ubuntu, CentOS), Bash/Shell scripting

DevOps Tools: Docker, Kubernetes, Jenkins, GitOps, Helm, SonarQube, Trivy, DevSecOps, HashiCorp Vault

Programming Languages: Go, Python, JavaScript, TypeScript, C/C++

Databases & Caching: PostgreSQL, MongoDB, Redis, RDS, DynamoDB, S3

Observability Tools: Prometheus, Grafana, Loki, EFK stack, OpenTelemetry

PERSONAL PROJECTS

–MAHE Research – Dermoscopy Image Classification using Self-Supervised Swin Transformer

Swin Transformer, PyTorch, U-Net, Self-Supervised Learning, Kubernetes – [GitHub](#)

- * Developed a **self-supervised Swin Transformer** pipeline for **malignant vs. benign dermoscopy image classification**, improving melanoma detection accuracy and robustness.
- * Trained with **contrastive pretext tasks** and deployed on **Kubernetes** for scalable real-time inference, achieving strong **AUC and interpretability via attention heatmaps**.

–DevOps Infrastructure Homelab

Docker, Kubernetes, Terraform, ArgoCD, GitHub Actions, Nginx, Prometheus, Grafana – [portfolio](#)

- * Designed a **production-grade DevOps homelab** deploying containerized services with **Docker & Kubernetes**, provisioning infrastructure via **Terraform** and managing deployments through **GitOps with ArgoCD**.
- * Implemented **CI/CD pipelines with GitHub Actions**, configured **Nginx reverse proxy with TLS certificates**, and integrated **Prometheus/Grafana monitoring** for secure and observable deployments.

EDUCATION

–Dayananda Sagar College of Engineering

2022-2026

B.E in Artificial Intelligence and Machine Learning (AI/ML)

CGPA: 9.83

ACHIEVEMENTS

- Secured **Top 6/244 teams** in **Argonyx RV Hackathon**, with project chosen for **patenting**.
- Completed **NPTEL certification** in *Cloud Computing and Distributed Systems* from **IIT Kanpur**.
- Google Cloud Certified:** Cloud Digital Leader – [Credly](#).
